

---

## Göktuğ Arda Gök

---

goktug.gok@sabanciuniv.edu • Tuzla/İSTANBUL • +905322037166

---

### EDUCATION

---

- Sabancı University** (CGPA: 2.88/4) 2021-2026 • Istanbul, Turkey
- B.Sc. in *Mechatronics Engineering*
- Lycée Saint-Joseph** 2016-2021 • İstanbul, Turkey

---

### WORK EXPERIENCE

---

- **Software and Mechatronics Engineer** in ADMEX Group. (January - Now)
  - Developed ADMEX Web, a Next.js pricing and configuration platform for the company's product lines, deployed on Vercel with MongoDB and Clerk authentication.
  - Automated bulk edits on a 468-page product catalog via Python scripting.
- **Mandatory Internship** in Altınay Savunma (June - August 2025)
- **Voluntary Internship** in FANUC Turkey (July - August 2024)
  - Basic Level Robot Programming Training
  - CNC Maintenance and Repair Training
  - Level 1 Roboguide Software Training
- **Voluntary Internship** in ADMEX Advanced Motion Experts (July 2023).

---

### EXTRACURRICULAR

---

- Saint-Joseph Debate Club Member (2018)
- Civic Involvement Project, visited 2<sup>nd</sup> and 3<sup>rd</sup> grade primary school students. (January - June 2022)
- Sabancı University Sports Club (SK) Board Member (2024 – 2025)
- Sabancı Seahawks Football Team Captain (2021 – 2025)

---

### PROJECTS

---

- **Manufacturing Process Project**, bending processes of a robotic positioner's main body.
- **Solid Modeling Project** on Solidworks: A mountain bike with all functioning parts and successful simulations.
- **Control System Design of Ultrasonic Range Finder** using Simulink.
- **Quadrotor Dynamics System Design** for 4DOF and 6DOF Systems in Simulink and MATLAB.
- **Industrial Motor Setup** using a Beckhoff panel with ST programming.
- **PLC-based Automation System** to manage a primitive box painting and drying process.
- **Distributed Control Simulation of Swarm Drones** in ROS 2 and MATLAB
- **Implementation and 3D printing** of 0.1-scale robotic positioners and tracks as mock-ups for the Schweissen & Schneiden trade fair.
- **Analysis, Implementation and Control of a Parallel Spherical Manipulator** for Graduation Project.
- **Vision-Based Spherical Motion Tracking System** (ArUco & Global Shutter Camera)

## PATENTS

---

- Robotic Linear Motion Unit (initial design)  
TR 2022/014378 (11 November 2022) | Lokarno 15-99  
Inventor and Applicant: Göktuğ Arda Gök
- Full Protection Robot Slider System (refined design family)  
TR 2024/010626 & TR 2024/010627 (16 December 2024) | Lokarno 15-09  
PCT/TR2024/051751 — international filing  
Inventor and Applicant: Göktuğ Arda Gök  
Modular, enclosed robotic slider system designed for safe and precise industrial motion.

## SKILLS

---

**Language:** Turkish (*Native*), English (*C1 - IELTS (7.5)*), French (*B2 - DELF*)

**Computer:** Microsoft Office Applications (Word, PowerPoint, Excel), Solidworks (Advanced), NX (Beginner), Matlab-Simulink (Intermediate), C++ (Beginner), Roboguide (Intermediate), PLC Programming (Beginner), ST Programming (Beginner), Linux (Beginner), Raspberry Pi (Beginner), Python (Intermediate), JavaScript / TypeScript (Intermediate), Next.js & React (Intermediate), MongoDB (Beginner), Git (Intermediate)

**AI Tools:** Claude Code, Cursor, ChatGPT used for full-stack development, automation scripting, and prompt engineering.
